Description
Go to tiki-searchresults.php page and click to SearchHelp link.
In help window, check strings:
Example: wiki and (forum blog) will find objects that contain wiki and forum or that contain wiki and blog in any order.
and
Use double quotes ( " " ) around a phrase to find terms in the exact order, next to each other. Example:"Alex Bell" will not find Bell Alex orAlex G. Bell but Alex Bells.

... doesn't show in other language. Of course, translation strings exist in language.php
