Description

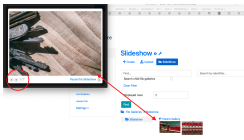

On file gallery you have a slideshow option (admin => listing).
Once enabled it will display a slideshow button at the top of gallery pages.
In browse mode you can navigate from page to page:
http://bsfez-11581-7931.show2.tikiwiki.org/tiki-list_file_gallery.php?galleryId=4

When clicking it start a slideshow that display images from the first file in the gallery.

When you have several pages this is not user friendly and is bad UX. (imagine you have hundreds of pictures)

To demonstrate:

- In the edit gallery Listing setting I set 2 image per pages (row) to have several pages
- I used small images but bigger images or on mobile the image will cover all the screen (you won't see the screen below the slideshow like in my screenshot)

ADDITIONAL INFORMATION;

Seems that the URL and the slideshow should use an offset parameter but it is not working.

Exemple: http://bsfez-11581-7931.show2.tikiwiki.org/tiki-list_file_gallery.php?galleryId=4&offset=4

Solution

Fix: The slide show should start by default using "this" page displayed picture as starting image.

Improvement: When clicking on the slideshow button we should have a sub-choice:

"Start from here"

"Start from the first image"
