Description

mpdf fails to print the output from PluginGanttChart
You can see it reproduced when you attempt to produce the PDF (by means of Tiki PDF option, using mPDF in the backend) from a wiki page showing the results on a sample Gantt Chart, such as the one reproduced in doc.t.o:
<https://doc.tiki.org/Sample-Gantt-Chart>

See what a local PDF printer (CUPS based, on linux, thorough Firefox) produces:

See what mPDF produces:

Maybe this could be solved by firing casperjs in order to get at least some look & feel of the output from that gantt chart?

Clicking at the "print" icon in the toolbar from the plugin ganttchart itself seems to display something similar

Reproduced in branch 24.x here:

<http://xavi-9794-7940.show2.tikiwiki.org/tiki-index.php?page=Sample-Gantt-Chart>
