### Description

2021-11-26 12:11:06 PM

The canonical domain of next.tiki.org should be tiki.org so that search index results feed tiki.org

The screenshot shows the Tiki Admin interface for managing canonical URLs. On the left, a modal window titled "Preference Search Results" displays three settings under the "Canonical URL" section:

- Canonical URL tag:  sefurl
- Canonical URL domain:  https://tiki.org/ (highlighted with a red arrow pointing from the subject line above)
- HTTPS for user-specific links:  sefurl, login

On the right, a browser developer tools window shows the generated HTML source code. A red arrow points from the highlighted domain setting in the modal to the corresponding <base href="https://next.tiki.org/HomePage"> tag in the source code.

```
<!DOCTYPE html>
<html lang="en" id="page_3804">
<head>
<base href="https://next.tiki.org/HomePage">
<!--Latest IE Compatibility-->
<meta http-equiv="X-UA-Compatible" content="IE=Edge">
<meta name="viewport" content="width=device-width, initial-scale=1" />
<meta http-equiv="Content-Type" content="text/html; charset=utf-8">
<meta name="generator" content="Tiki Wiki CMS Groupware - https://tiki.org">
<meta content="https://next.tiki.org/" name="twitter:domain">
<link rel="canonical" href="https://next.tiki.org/HomePage">
<meta content="https://next.tiki.org/HomePage" property="og:url">
<meta name="keywords" content="Tiki, Wiki, CMS, Groupware, blog, article, col">
<meta name="author" content="Tiki Community">
<meta name="description" content="Tiki is the Free/Libre/Open Source Webs">
<meta content="Tiki is the Free/Libre/Open Source Website and online Applicat">
<meta name="twitter:description" content="Tiki is the Free/Libre/Open Source !">

Either

- Canonical was change since last refresh
- System Configuration is used to override
- or ?
