Description

Once the file gallery batch feature is enabled:

At https://next.tiki.org/tiki-batch_upload_files.php?galleryId=17 at the bottom if you enable "Upload into galleries according to sub-directories" other options are displayed but the design alignment and position of sentence is broken. Col-4 and 8 are over lapping instead of being one next the other.

As the additional options are child of "Upload into galleries according to sub-directories" they should look like child options (indent)
