### Description

On a Tiki23 I want to format properly and nice a section with several numbered paragraph (like I do for the TRM pages): <https://tiki.org/Roundtable-Meeting-2021-12>

But seems our parser ignore everything about paragraph and each line must be indented separately. Worst it does understand the difference between a line feed (one line down) and a carriage return (start next line) :

<https://stackoverflow.com/questions/12747722/what-is-the-difference-between-a-line-feed-and-a-carriage-return>

To have this : \_\_\_\_\_

I have to write the following with several extra %, the sign plus before each line, etc.

Not what you expect from a Wiki... It is supposed to help the editor, not to kill him with complicate syntax.
