Hi Bernard,

I did a test. I noticed that when I go to [https://example.org/tiki-list\\_articles.php](https://example.org/tiki-list_articles.php) the username stays the same.

I would like to clarify that I have seen this result locally.

At <https://next.tiki.org/login>, I can see I am not logged in.

At [https://next.tiki.org/tiki-list\\_articles.php](https://next.tiki.org/tiki-list_articles.php), I see the "n" like Bernard. But also a logout button, which I should not see given I am not logged in.

Suggestion: check if this is a local configuration (some code in a module)

This morning I flushed my cookies and retest.

At <https://next.tiki.org/HomePage> (blue) I need to validate cookies (I'm not logged).

I go to <https://next.tiki.org/Community> (orange) and I'm logged as "n".

If I go back at the <https://next.tiki.org/> (blue) I'm not logged.

Tested at next good now, thanks
