- ● User registration tracker plugin option should apply the registration settings from login control panel

Description

Using a Tiki at tiki-admin.php?page=login you can set a tracker to collect users information. In the group (registered) tiki-admingroups.php you can define what field to display in the registration form.

This work fine.

You can also use a tracker plugin in a wiki page to fill a tracker item and include a registration. However the input field displayed are limited to :

- Username *
- Email *
- Passcode to register * (if set)
- New Password *
- Confirm password *

And NOT the list of field you set in your Group (as above).

The tracker plugin Registration option shouldn't modify the fields require for the registration and the way the admin has set it.

I created an instance to demonstrate.

While you are not logged if you go to register

:<http://bsfez-11581-7961.show2.tikiwiki.org/tiki-register.php>

The page show ALL the fields I added for registration at

:<http://bsfez-11581-7961.show2.tikiwiki.org/tiki-admingroups.php?group=Registered>

Good.

Compare to the registrations fields proposed in the tracker plugin and you see all are missing.
