And NOT the list of field you set in your Group (as above).

The tracker plugin Registration option shouldn't modify the fields require for the registration and the way the admin has set it.

I created an instance to demonstrate.

While you are not logged if you go to register :<http://bsfez-11581-7961.show2.tikiwiki.org/tiki-register.php>

The page show ALL the fields I added for registration at

:<http://bsfez-11581-7961.show2.tikiwiki.org/tiki-admingroups.php?group=Registered>

Good.

Compare to the registrations fields proposed in the tracker plugin and you see all are missing.
