Description
At /categories and https://dev.tiki.org/tiki-admin_categories.php we can see the categories list. It is a bit stiff and when you have a lot of categories and start to open them to see the child categories the UI/UX is not very good.

Solution
- It should be possible to keep the child and parent category under a visual ensemble (the even odd row background color is common to all and add confusion).
- We may add an option to add a numeration (like paragraph numeration).
- When opening a category another close (Accordion)

@Bernard. I would like to have a little more precision on the task concerning the addition of an option for the numbering of categories.

Hello @nasser.ngandu,

Accordeon for category is being added (by you ;-) ) in Tiki master so it may be good enough for now. https://gitlab.com/tikiwiki/tiki/-/merge_requests/1767

Re-reading... Adding number before the category may be more confusing than helping.
