Related-to
   - ⊗ Google reject Tiki generated sitemap
   - ● Wrong URL at tiki-admin_sitemap.php for submitting a Tiki generated sitemap (manual VS console) ?
   - ● Scheduler failing to create sitemap (no commands defined in the "sitemap" namespace)
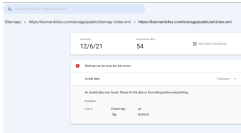

Description
   At google search console (https://search.google.com/search-console/sitemaps) my sitemap (using https://bernardsfez.com/storage/public/sitemap-index.xml) is submitted via the console.php command (using the Tiki scheduler).

   If I click on the corresponding row it open a detailed table where I see that Google fetched 2 XML and that fetching my articles XML it produce 1 error.

When I click on it to see the details I see error about the lasted date.

And when I look at https://bernardsfez.com/storage/public/articles.xml the dates are all wrong. It seems to prevent Google to index my articles.
When I index one by one articles using https://search.google.com/search-console/inspect (when a page is not indexed I have an option to index it) It work just fine with the right date.

I also checked at tiki.org and I see the same errors: https://tiki.org/storage/public/articles.xml

XML where we can see the date errors

Solution

Fix the date conversion in the article XML file generated by Tiki at storage/public/articles.xml

https://gitlab.com/tikiwiki/tiki/-/merge_requests/1843
this problem is solved

Bernard Sfez / Tiki Specialist 09 Oct 22 11:20 GMT-0000

Thank you **@Eutyche ODIMBA**, I understand it has been merged into master (future Tiki25).

Please note that this bug was declared on Tiki23 and the actual stable is Tiki24, so in end user's point of view the problem is not solved but has been fixed in Tiki25. ?
For the future I suggest to add the version: "has been fixed in ..." so someone reading a ticket such as this one is not confused.
