Description

See : http://bsfez-11581-7922.show2.tikiwiki.org/tiki-edit_banner.php?bannerId=1

The image is big (width and height) and it overlap the interface.

Update; fixed on master

Solution

The image should be displayed in the interface boundaries.

Image interface boundaries should be visible like for all other fields (borders)

@all, would it be wise to have a hard limit (max height or max width or both) or add a tooltip for maximum size of a banner or we let it free ?

If hard limit, should we reject or resize when it pass the limit ?

After testing i discover that, the image banner is no longer on the cash and it does not exist on the database. So when it try to create an image, that why there is that message.

And ?

I don't understand... you are trying to fix ?

I tryied to reproduce the bugs on defferent version of tiki 23.x, 22.x and 24.x but everything work fine. i thank maybe it could be problem with cache.

Also on https://nextdoc.tiki.org/tiki-edit_banner.php?bannerId=2 i do not have the rights to use the feature: tiki_p_admin_banners.

Clean Tiki

Tested on a clean Tiki24 installed from GIT, the image is overlapping the interface;

Screen Recording 2022 03 03 At 7.47.50

Tested on a clean master installed from GIT, the image is not overlapping the interface;

Screen Recording 2022 03 03 At 7.54.54

PS: doc.tiki.org is on Tiki24

PSS: While I was at it, I also tested the image replacement and it is working fine on master but not on Tiki24
