Related question: Is it really necessary to have a site icon in addition to the site logo? Why not just have the site logo and it will scale to the necessary size? I guess I've never been clear on the reason for it. I'd like to know what that reason could be. If the icon isn't necessary, then the `layout_view.tpl` file could be simplified with just a module zone to hold the logo, etc. and I think this would fix the admin ui issue.
