Description
RSS feed for Articles in tiki.org produces WSOD. Reproduced here:
https://tiki.org/tiki-articles_rss.php?ver=5

or
https://tiki.org/tiki-articles_rss.php?ver=5&css=y
(as indicated here https://profiles.tiki.org/RSS+Handler which used to be a valid url afair)

---

or

https://tiki.org/tiki-articles_rss.php?ver=2

However, it works well in themes.t.o:
https://themes.tiki.org/tiki-articles_rss.php?ver=5

I wanted to add that articles rss feed to the Admin UI backend rss module (loaded from here
https://profiles.tiki.org/Unified_Admin_Backend_Default_Dashboard_1), but there is no point if it triggers some
error 500 or WSOD by any other reason.

Any tip anyone on how to solve? Oliver Hertel maybe?

Solution
Real solution would be to fix php code to prevent WSOD (error 500?) from happening at all if an article happens
to have this missing field again in the future.
Thanks heaps for the temporary workaround, Oliver!

Workaround
database error: author field for 1 single article was empty. fixed it.

This is the problem (see below). There was ONE article with an "author" field that was
empty. I fixed the entry. Now it works again. 😃

AH01071: Got error 'PHP message: PHP Fatal error: Uncaught
Laminas\\Feed\\Writer\\Exception\\InvalidArgumentException: Invalid parameter: author
array must include a "name" key with a non-empty string value in
/var/www/docroots/tiki.org/vendor_bundled/vendor/laminas/laminas-
feed/src/Writer/Entry.php:73\nStack trace:\n#0
/var/www/docroots/tiki.org/lib/rss/rsslib.php(288):
Laminas\\Feed\\Writer\\Entry->addAuthor(Array)\n#1 /var/www/docroots/tiki.org/tiki-
articles_rss.php(131): RSSLib->generate_feed('articles', 'articles/', , *Array*, *'tiki-
read_artic...'*, , 'articleId', 'tiki.org articl...', 'title', 'Last articles.', 'heading', 'publishDate',
'author')\n#2 {main}\n thrown in
/var/www/docroots/tiki.org/vendor_bundled/vendor/laminas/laminas-
feed/src/Writer/Entry.php on line 73', referer: https://dev.tiki.org/

Thanks heaps for the temporary workaround, Oliver!

Imho, real solution would be to fix php code to prevent WSOD (error
500?) from happening at all if an article happens to have this missing
field again in the future.

I did set this tracker item status as "pending", and resolution status as
"partially solved", as a reminder for anyone else with skills and time (if
anyone, not me, sorry) to properly fix this issue.

Rodriguez Nyiringabo 06 Jun 22 21:36 GMT-0000

Fixed !
