### Description

I stumbled upon this while googling something else (the documentation of Tikis Paypal interface):

<https://github.com/romoxi/BobShop>

The claim is "BobShop is a shopping cart system for TikiWiki. "

So far I haven't taken a deeper look. Has anyone else seen this? Or tested?

Advantages/disadvantages compared to CART? Is this independent development or are the authors known or identical with Tiki devs?

I am asking those questions, because

- I am looking for something that accepts more than just Paypal
- Tiki Credit Card integration is in it's infancy

Thanks

hman

There is a public demonstration at <https://bobshopdemo.bob360.de/HomePage> but unfortunately in German, so you might have to google-translate...

This demo is run on Tiki 21.2.

Yes. And I am trying to improve it. It is buggy and it doesn't work if you install from profiles. Some tracker data are missing.
