Related-to

- ✖ Payments, memberpayment plugin; Payment is done but user is not assigned in the right group

Description

I'm testing the PayPal capabilities of Tiki and this is about the "memberpayment" wiki plugin : <https://doc.tiki.org/PluginRegisterMemberPayment>

Following the doc I used the plugin as simple as possible as well as other requirements; <https://doc.tiki.org/Payment>

Groups

I created a group;

- Enabled "User can assign himself or herself to the group"
- Set Membership expiry, Number of Days to 365
- Set Pro-rata Membership to "year".

Payments

- Payment system: Paypal
- Currency: Euro
- PayPal ID: paypal email
- PayPal environment: Production
- Enable PayPal instant payment notification (IPN)
- Enable Payment data transfer (PDT)
- Set the Payment data transfer (PDT) token
- Redirect after PDT payment: https://dev.domain.org/BernardPremium_homepage

Subscribe page

I set a plugin:

```
{registermemberpayment group="BernardPremium " price="1"  
returnurl="https://dev.domain.org/BernardPremium_homepage"}
```

Use cases (Paypal payment is completed in all cases)

If a member of the Admins group subscribe himself and do a manual payment: I got a WSoD (<https://dev.domain.org/tiki-payment.php>). (bad)

If a member of the Admins group subscribe himself and do a Paypal payment: The user is NOT assigned to the group, he is not returned to the Tiki site automatically. If he clicks on "return to merchant" the user is redirected to [tiki-payment.php?invoice=nn](https://dev.domain.org/tiki-payment.php?invoice=nn) (bad)

If a registered user and do a Paypal payment: The user is NOT assigned to the group, he is not returned to the Tiki site automatically. If he clicks on "return to merchant" he is returned back to ["tiki-payment.php?invoice=nn"](https://dev.domain.org/tiki-payment.php?invoice=nn) (bad)

While I'm not getting into the code I understand 2 mechanism are invoked and not working.

Group assignment

Returning from Paypal

I'm not sure if they are required together to have the user assigned.

Solution

This is duplicate, see "Related-to" field.
