Description

On a Tiki23 in articles on the tiki "articles" view the URL of the article is changed for the URL in the article source field if there is one.

It is demonstrated at http://bsfez-11581-8053.show2.tikiwiki.org/tiki-view_articles.php

The first article (playing poker) href point to the correct URL

The second article (This is my title) href point to a wrong URL

It is using the Source URL that was set at :

http://bsfez-11581-8053.show2.tikiwiki.org/tiki-edit_article.php?articleId=1#content_edit_article1-5

The following list of article show the correct URL :

http://bsfez-11581-8053.show2.tikiwiki.org/tiki-list_articles.php

Solution

Setting an Advanced source URL for an article shouldn't change (break) the original article URL.
