Description

Currently the Wishlist reports just 2 bug reports (TWO) that are open. Very hard to believe, unless some closed thousands of bug reports...?!

Or has the Wishlist lost contact to some external data storage?

Comments

Bernard Sfez / Tiki Specialist 01 Feb 22 15:42 GMT-0000

Seems it display only today's items for me.

Marc Laporte 02 Feb 22 03:39 GMT-0000

Looks like an indexing issue. I will rebuild

Marc Laporte 02 Feb 22 04:23 GMT-0000

I rebuilt index and then rebooted server. Now working.

Bernard Sfez / Tiki Specialist 02 Feb 22 06:36 GMT-0000

I reopen because today I see 0 items in the dashboard.

Yesterday I saw only 1 item from the same day (1/02/2022) and I felt it has to do with "today's" date. I tested and modified an item or 2 to check. (will see after index rebuilt again)

hman 02 Feb 22 09:48 GMT-0000

I still see only the ones that had changes made today (Feb. 2nd)

Bernard Sfez / Tiki Specialist 09 Feb 22 05:26 GMT-0000

@hman, it has been fixed, please close the ticket.

hman 09 Feb 22 08:25 GMT-0000

It's broken again. Today I get only an error "Malformed search query: no such index".

Also, I would like to ask the one who wrote it to preselect sorting by date, descending, and to add ticket numbers, thank you.

Bernard Sfez / Tiki Specialist 09 Feb 22 19:42 GMT-0000

You are correct, broken for me too...

Marc Laporte 17 Feb 22 18:14 GMT-0000

We have found the root cause. Some of the pre-dogfood servers have a collision with the index of a production site.

The solution is to use: Divergent Preferences in Staging Development Production
