### Description

Apparently it is not possible to create a multi selection field in a tracker "Unterstützungsmeldungen" with the option "Mit einem regelmäßigen Foerderbeitrag".

This results in a permanent name  
unterstuetzungsmeldungenMitEinemRegelmassigenForderbeitrag, which will produce multiple (seven!) errors when a user fills in the form.

There seems to be a constraint on the length which is not monitored upon creation of the tracker. It should not be possible to create tracker and field names and options that will, as a result, make the tracker fail!

Also, the exact numerical limit is intransparently unknown. I will have to look into the DB to find out...

For some use cases, the arguments for multi selection or checkboxes MUST be quite long. It is legally not sufficient to just record "user has checked a checkbox" when this in effect leads to a contract. The full text of the option, as displayed to the user, must be recorded. This is especially important for options where a user entitles the org running the Tiki to make repeated SEPA withdrawals from bank accounts!

### Importance

10 high

### Easy to solve?

10 easy
