Description
   Strings from the main app menu in the side column in 24.x from git today, or tiki24beta(.tar.gz) show wrong encoding.
   Reproduced with Catalan, Spanish and French,
   Using all defaults. In Ubuntu 18.04 and 20.04 computers, with mysql InnoDB (all default options at installation time)
Attempting to create a show2.t.o instance, I get this error (could it be related?)

**Fatal error: Uncaught Error: Undefined constant 'Tiki_PATH' in**

    Yes, I fixed it. Closing due inactivity / no reply from Xavi who should re-test but I believe it is confirmed fixed.
