Description

Since Tiki24 we have a new search interface to find a plugin in our LONG list of plugin at : tiki-admin.php?page=textarea#contentadmin_textarea-2

This is a real nice improvement saving resources and space however it is not working at Dev.t.o

Tested on another Tiki24rc1 (bernardsfez.com) and it is displaying results.

This AT dev.t.o look different on Safari than on Chrome. (again working fine on bernardsfez.com)...
Caches refreshed.
