### Description

Module execution failed if the visitor is anonymous.

Anonymous can't see listpages.php even if they have Wiki admin permissions

This filter is no longer work if the user is anonymous

```
{filter field="title" content="{{page}}"}

```

Instance coming... (not reproducible with default settings... more tomorrow)

#### Comments

Bernard Sfez / Tiki Specialist 09 Mar 22 09:20 GMT-0000

It has fixed itself today...  
I did several test and update, flushed caches, etc.  
I also removed related and unused options but I didn't see changes right away.  
I close but keep an eye on this.
