Description
On Tiki Security and Login admin control panels we have an option to display Captcha_questions. This is working fine where Google re-captcha fail (and it fail) or if your user have issues with the internal Tiki captcha.

But how do we do that?
May be the easiest way is to perform a translation using the custom translation existing system, BEFORE the answer is verified.

Simple number case;
"Answer to submit, 3+4=:7" => "Combien font 3+4=:7",

Text case;
"In which country is the Liberty Statues: New York" => "Dans quelle ville trouve t'on la Tour Eiffel:Paris",

Translation being done before the verification allow a better multilingual and multi-cultural usage.
