Description
When URL is entered in a parenthesis it takes the closing one and includes it in the external link:

(E.g. Google — https://google.com/)

The expected result would be that the ")" is not included as part of the link.

Solution
Change line 1277 of [lib/parser/parserlib.php](lib/parser/parserlib.php):

---
$patterns[] = "#([\n( ])([a-z0-9]+?)://([<,\n\n]+)#i";
