Description

For some reason, there is no space to enter comments on dev.t.o. I am logged in, so I see no reason why I shouldn't be allowed to comment? I can edit bug reports, but being unable of posting my comments in the original bug report posting isn't very, ahem, polite to the original reporter...

Update: it seems to be some AJAX loading (intermittent) issue?

After the sixth (!) reload the button "Post new comment" magically re-appeared..
