Description
This is the second Tiki24 I install from new files (git clone) and update the database in the last 48h that shows the issue. (one on my local OSX, another one a Debian10 Virtualmin)

On database update it keep coming back on the Tiki Installer Security Precaution page.
Then it is in loop as long as I keep being on the tiki-install.php.

If I then jump directly to the Homepage I can see an incomplete installed Tiki.
I have to complete manually using the console (see the workaround I added)

Update 2022-08-14
Just tried again on a Debian10 Virtualmin and this time the installation wasn't stuck on the Tiki Installer Security Precaution page. BUT seems it didn't complete the final stages (index rebuilt...).
I completed manually again and this fixed the issue.

Workaround
To complete manually the installation from shell;

- php console.php installer:lock
- php console.php database:u (seems it wasn't done)

> php console.php database:u Update completed. Installed:
> 20200820_performance_table_creation_tiki Installed:
> 20210819_theme_unified_admin_backend_pref_default_tiki Installed:
> 20211020_mark_image_gallery_tables_as_unused_tiki Installed:
> 20211110_create_api_tokens_tiki Installed: 20211126_timezone_date_update_tiki Installed:
> 20220111_backlinks_tiki Installed: 20220112_extend_api_tokens_tiki Installed:
> 20220112_extend_oauthserver_clients_tiki Installed: 20220113_password_blacklist_tiki
> Installed: 20220119_make_user_nullable_api_tokens_tiki Installed:
> 20220601_discard_hash_column_from_articles_tiki Queries executed successfully: 29

- php console.php i:r -p
- php console.php c:c
