Description

If a user has no access to a feature or a wiki page, normally the login page is shown. However, if the site has a phpLayers menu (E.g. {phplayers id=43 type=horiz} in Site Identity features - Custom Code - Content), the phpLayers menu fails and dies. The user only sees a blank page with the message "LayersMenu Error: setMenuStructureString: empty string. Halted".

Solution

As a temporary fix, I added a line to lib/smarty-tiki/function.phplayers.php. This way the phplayers menu does not halt, and the normal login screen is shown. In version 1.10, the line should be added to /tiki/lib/phplayers_tiki/tiki-phplayers.php instead.

```
include_once ("lib/phplayers/lib/PHPLIB.php");
include_once ("lib/phplayers/lib/layersmenu-common.inc.php");
include_once ("lib/phplayers/lib/layersmenu.inc.php");
include_once ("lib/phplayers/lib/".$types%22$type%22);
// beware ! that below is a variable class declaration
$class = $classes%22$type%22;
$phplayers = new $class();
$phplayers->haltOnError = "no"; // This line added by hsaelens
$phplayers->setDirrootCommon("lib/phplayers");
$phplayers->setLibjsdir("lib/phplayers/libjs/");
$phplayers->setImgdir("lib/phplayers/images/");
```

```
$phpplayers->setImgwww("lib/phpplayers/images/");  
$phpplayers->setTpldirCommon("lib/phpplayers/templates/");
```
