Description
  A form anonymous can fill is still very common and used in many website (tracker items, registration and contact form).
  We are used to it for so many years that we don't see it, but for others, this is not a good image for Tiki.

  On mobile and desktop it really look like unfinished work.

  1. The buttons colours are wrong:

     • Submit should be primary
     • Refresh captcha should be secondary

  1. Width and field should match.
