Description

I used <https://tiki.org/forumthread78791-New-Wiki-pages-wont-take-the-Groups-default-Category> and <https://tiki.org/forumthread77665-What-is-the-Markdown-syntax-for-LaTeX-equations> on Firefox.

It is about the first comment header and the last message elements.

Better separation between "section" is required (especially on mobile).

Importance
