Description

On Tiki 24 using the Classic Bootstrap layout with the default theme, the module were centered in LTR and RTL.

On Tiki 25 things changed (logo module?) and I believe it was wanted to align the modules to the "start" of the selected language.

LTR => left
RTL => right

While it look like justify-start for RTL (and I like better than centered or space between)
In LTR it look space between is applied (and that not a happy design on desktop)

I think the change (if it was intended) make sense in 2022 and modules should use "start". What is set should be the same for LTR and RTL
