- Trackers, Rating; Using the star mode with the rating tracker field require the deprecated (experimental) star field enabling

Description

On Tiki25 using a tracker you can set a Rating field (after enabling it from the Tracker admin console panel).

You have 3 options only for the user interface, the mode of rating in the tracker field options, Mode:

1. Stars (stars icon from Tiki)
2. Radio buttons
3. Simple (on/off, like a like button)

That would be great if we could use the Stars mode but being able to customizes/change the icon displayed.

Admin could choose his own stars, forks (restaurant), Money (value), Houses (hostel), etc... It's endless and will allow think of many things.

Things to think about;

- Safety mechanism (size of the icon, filetype)

- Where this is saved (I guess file gallery)
- Option to use a fontawesome icon ? (would make it easier... no files required)
- ...
