- Trackers, Rating; Using the star mode with the rating tracker field require the deprecated (experimental) star field enabling

### Description

On Tiki24 using a tracker you can set a Rating field (after enabling it from the Tracker admin console panel).

While you need to use values for the voting mechanism, you can set labels for these values in the tracker field options.

However when seeing it on a tracker item, when you want to cast you vote/rating the mouseover will display the value instead of the label.

Hi there,

Thank you for taking the time to report the issue with Tracker, Rating field. We appreciate your contribution to the Tiki community.

We have reviewed your report and can confirm that we understand the issue you have described. We have attempted to reproduce the issue and have found the described behavior.

We will investigate this further and make sure there are no duplicates of this issue. If the issue is easy to fix, we will do our best to fix it in a timely manner.

Thank you again for your contribution and for helping us make Tiki better for everyone.

Best regards,  
The Tiki Team
