Description
        Taken from: https://doc.tiki.org/Calculations
        "You can use it with spli-list to count the number of items in a list or in an item-link (should work
        with item-list dynamic item-list). "
        EXAMPLE GIVEN
        Let say I have an item-link permanameBooks with 12 items linked.
        (count
        (split-list
        (content permanameBooks)
        (separator ,)
        (key a)
        )
        )
        -> 12

        If you do a (concat permanameBooks) it just gives ArrayArrayArray so split list cannot work

        I am going to try and add the , by using the format option with %0,

Importance
        5

Easy to solve?
