Description
    PDF-generation does not work at all in Opera 9. The pdf generation page is shown, but when you click "create" nothing happens. I have check this for wiki pages and articles. I don't know if pdf-generation is available for other features.

Solution
    Closing bug as PDF generation is cancelled as of 2.x and only security fixes will be released for the 1.9 branch.

    Check the PDF docs for more info.
