Description
Hello

I went to enable HTML on all wiki pages so that I could do text wrap around an image. However, it appears that the code still appears instead of actually correctly wrapping the text as if it doesnt understand the html code afterall.

Did you enable html in general and on each page?

Bernard Sfez / Tiki Specialist 11 Oct 21 15:30 GMT-0000

As per Tiki23 the HTML pages feature work properly. Please retest and if needed create a new ticket with updated information and way to reproduce.
