Description
At https://dev.tiki.org/item8530-Server-check-is-raising-false-alarms-about-Tiki-requirements I used the wikiplugin img to display an image from anywhere on the internet.

The plugin display a broken image.
If I check the code and the url of the src it is correct and display the image.

Hi, @Bernard Sfez / Tiki Specialist!

Thank you for taking the time to report the issue with wikiplugin img. We appreciate your contribution to the Tiki community.

We have reviewed your report and can confirm that we understand the issue you have described. We will investigate this further and make sure there are no duplicates of this issue, or if no task has already been created to address this issue, and will do our best to fix it in a timely manner.

Thank you again for your contribution and for helping us make Tiki better for everyone.

Best regards,
The Tiki Team
