### Description

Show page title on per page edit, if set to off, turns off page title as well as page category.

One setting effecting two features! It should be normal behaviour to see page category without page title.

Hi there!

Thank you for taking the time to report this issue.

We have attempted to reproduce the issue you described but were not able to do so as you did not provide a specific instance or steps to reproduce. To assist us in understanding the problem you've reported more accurately, could you provide further details or examples (a show instance, for example)? Clear and specific information will enable us to investigate and resolve the issue effectively.

Best regards,  
The Tiki Community Support Team

Kevin Doyle 15 Nov 23 21:55 GMT-0000

Hello Josue,

Please see the attached video gif. It shows me selecting "Add an option to hide the page title per wiki page" option. So I only want to hide the Title of the Page. At the end of the video I select "hide page title" BUT the page title AND the category section disappear. This is unwanted behaviour. The categories should remain visible.

Cheers,  
Kevin.

Josue Zirimwabagabo 28 Nov 23 02:23 GMT-0000

Hi Kevin!

Thank you for sharing the attachment that shows the unwanted behavior. We can confirm that we understand the issue you have described.

We will investigate this further and make sure there are no duplicates of this issue. If the issue is easy to fix, we will do our best to fix it in a timely manner.

Thank you again for your contribution and for helping us make Tiki better for everyone.

Best regards,  
Tiki Community Support Team
