Description

When using the "_htaccess" files in Tikiwiki 1.9.5 you get an "Regex could not be compiled" access error in some of the directories when using Apache 2.2.

The Problem occurs, if the statement <FilesMatch "<*"> is in the .htaccess file.

Solution

According to the Apache 2.2 documentation, the Server expects a regular Expression for the FilesMatch directive.

It has to be replaced either by <Files "<*"> or by <FilesMatch "<*"> to work correctly.

fixed on 1.9 and 1.10 branch — luci

That this helps with Apache 2.2 but has no bad effect on other versions of Apache?

luciash d' being ☐ 24 Nov 07 04:11 GMT-0000

I already know this for long and it's right that it must be ".*"
