Description

After upgrading 1.9.4 to 1.9.5, a search entire site returns the following error. I looked in db/fulltext.sql and didn't see a create fulltext index statement for tracker. What tables/columns should be indexed?

in /home/lampp/htdocs/kniki/lib/tikidblib.php on line 134

Context:

File    /kniki/tiki-searchresults.php
Url     ///kniki/tiki-searchresults.php?highlight=draw&where=pages&search=go

Query:

```
SELECT ttif.`itemId` AS name, LEFT(tt.`name`, 240) AS data, tt.`trackerId` AS hits, tt.`lastModif` AS lastModif, tti.`itemId` AS pageName, tti.`itemId` AS id1,1 AS id2, MATCH(`value`) AGAINST ('draw') AS relevance FROM `tiki_tracker_item_fields` ttif LEFT JOIN `tiki_tracker_items` tti ON (ttif.`itemId`=tti.`itemId`) LEFT JOIN `tiki_trackers` tt ON (tti.`trackerId`= tt.`trackerId`) LEFT JOIN `tiki_tracker_fields` ttf ON (ttf.`fieldId`= ttif.`fieldId`) WHERE ttf.`isSearchable` = "y" AND MATCH(`value`) AGAINST ('draw') ORDER BY relevance desc, tt.`trackerId`
```

Values:

Message:

Can't find FULLTEXT index matching the column list
Solution
I found it in CVS. I guess it didn't make it into the 1.9.5 tarball.

    tiki/db fulltext.sql,1.4,1.5

    CREATE FULLTEXT INDEX ft ON tiki_tracker_item_fields(value);

I am 99% sure this is solved in 1.9.7
