### Description

See <http://dev.tikiwiki.org/TestTrackerlist>

You will see that links do not work on the first trackerlist plugin. They work on the second and third one though.

Removing description from the fields shown in the popup seems to fix it. But not all descriptions seem to break it though - see the second plugin filtered differently which works.

The TestTrackerlist page no longer exists. Could you create a show instance demonstrating? Is this related with the showlinks parameter?

As per Tiki23 the issue seems fixed. (since a while)  
Please retest and reopen this ticket with updated information if you still have this issue.
