Description

When I select "Admin > Wiki > Mandatory category in the category tree", the list of categories while editing a wiki page is blank, or it says no category is defined. However, if you click on "admin categories", they are defined indeed.

When you unselect this check box, and clean caches, categ. list is working fine again.

This is not a theme specific issue (reproduced with geo.css, tikineat.css, lesjetesdelencre.css, ...)

-

update: sylvieg fixed that months ago, I think. (thanks sylvie)
