### Description

When subject of a message sent with intra tiki boradcast feature, and containing quotation marks, the message is not sent, nor saved in sent messages, and an error message saying that quotation marks are not allowed in message is shown. But message is lost. :-/  
(not kept with back button of browser)

BTW, If message preview was a feature, message wouldn't have been completely lost, I guess: last copy of preview would have been there with back button)

As per Tiki23 it is possible to use double quotes (quotation marks I guess) in the subject of intermessage in Tiki.
