Simple "solution" - didn't check if it is fully correct:

lib/wiki/wikilib.php ; function get_user_all_pages(\$user, \$sort_mode)
change

```
$query = "select distinct(p.`pageName`), p.`user` as lastEditor, p.`creator`,  
max(a.`lastModif`) as date from `tiki_actionlog` as a, `tiki_pages` as p where  
a.`pageName`= p.`pageName` and a.`user`= ? group by p.`pageName` order by  
".$this->convert_sortmode($sort_mode);
```

to:

```
$query = "select distinct(p.`pageName`), p.`user` as lastEditor, p.`creator`,  
max(a.`lastModif`) as date from `tiki_actionlog` as a, `tiki_pages` as p where  
a.`pageName`= p.`pageName` and a.`user`= ? group by p.`pageName`, p.`user`, p.`creator`  
order by ".$this->convert_sortmode($sort_mode);
```

this helps on tiki 1.9.6 and postgres 8.2.3

Beestje 10 Apr 09 13:02 GMT-0000

Tested on 1.9.11 and it works.

Beestje 10 Apr 09 14:26 GMT-0000

Disregard my test, it's tested on 1.9.11 and MySQL instead of PostgreSQL...
