Simple "solution" - didn't check if it is fully correct:
lib/wiki/wikilib.php ; function get_user_all_pages($user, $sort_mode)
change

$quer = "select distinct(p.`pageName`), p.`user` as lastEditor, p.`creator`, max(a.`lastModif`) as date from `tiki_ac"tionlog` as a, `tiki_pages` as p where a.`pageName`= p.`pageName` and a.`user`= ? group by p.`pageName` order by ".$this->convert_sortmode($sort_mode);

to:

$quer = "select distinct(p.`pageName`), p.`user` as lastEditor, p.`creator`, max(a.`lastModif`) as date from `tiki_ac"tionlog` as a, `tiki_pages` as p where a.`pageName`= p.`pageName` and a.`user`= ? group by p.`pageName`, p.`user`, p.`creator` order by ".$this->convert_sortmode($sort_mode);

this helps on tiki 1.9.6 and postgres 8.2.3

Tested on 1.9.11 and it works.

Disregard my test, it's tested on 1.9.11 and MySQL instead of PostgreSQL...
