### Description

In a tracker (tiki-view\_tracker\_item.php) with mandatory fields or fields with a validation (ex.: email), if I don't fill the form properly, on save, I will be in view mode with the "Following fields are incorrect" warning. I must then click edit again to correct the info. This is not logical. I should stay in edit mode unless the form is saved without error.

### Solution

fixed in BRANCH-1-9

## Comments

Bernard Sfez / Tiki Specialist 13 Oct 21 14:53 GMT-0000

As per Tiki23 when there is an error on validation (create the item) you stay on the edit modal.
