### Description

Add data to a sheet. Click save. You'll see the sheet with the data that was there before you added yours.

However, your new data has been stored properly. If you click again in tiki-view\_sheets.php?sheetId=N, then you'll see the sheet with your data.

### Solution

fixed in newer version (and trunk - tiki5 for sure). Tiki 2 is not maintained any more. Upgrade of sites needed.
