Description

In the type "date and time" it may be necessary to be able to have only 'year' choice instead of year, month, day and hour

: FRENCH

:

Dans le type "date and time" nous devrions pouvoir avoir seulement année (de x x au choix), seulement mois/année ou seulement jour/mois/année. Pour plusieurs trackers, la suppression de l'heure est nécessaire, comme lorsqu'on demande la date de naissance d'un individu !

Solution

Add options to the tracker-field-type, like with the textarea or numeric field types.
Does that need changes in the backend(saving)?

Workaround

It is quite easy to use a Mathematical field to split and get any part of the date you want.

(date (str F) trackerPermanameDate)

Ex.: on this site, we want the date of bug reports, but not the time of day.

Marc Laporte 30 Nov 07 17:47 GMT-0000

Sylvie added a "d" (date) parameter to date tracker field in 1.10

WarMacre 03 Mar 11 18:30 GMT-0000

As the original poster queried whether it was possible "to be able to have only 'year'" as a choice, does anybody know how to do this or at least know how to edit the original .js file to make it possible?

Mike Finko 04 Dec 15 11:10 GMT-0000

The 'date' or 'date & time' (for Entry) is excellent, maybe one step farther?

Date & Time - dd/mm/yyyy/hh/mm/ss
Date & Time - dd/mm/yyyy/hh/mm
Date & Time - dd/mm/yyyy/hh

Date only - dd/mm/yyyy
Date only - mm/yyyy
Date only - yyyy

I can't imagine someone would need this, but if going this far, maybe also add:

Time only - hh/mm/ss
Time only- hh/mm
Time only - hh

For viewing (i.e. List), Admin > General > Date & Time seems to already have full flexibility for customizing.

Jonny Bradley 21 Jan 16 13:53 GMT-0000

Would suggest adding a "format" option so you can add whatever format you want using <http://php.net/date> format probably?

You can already do this in smarty templates using the `date_format` modifier.

drsassafras 26 Feb 20 17:35 GMT-0000

Is this still an issue? If so please update the version information in the ticket.
