Description
>    I would like to have someone develop a resource checkout system. This could be for a small library
>    of books, videos, etc. or other resource that people can check out (company van, etc.).
>
>    Admin Side:
>
>    • Category admin
>    • Resource admin
>    • Users admin
>    • Inventory status (what is checked out, what is in stock etc.)
>    • Users who currently have the item
>    • Checkout length admin (custom settings by item, or blanket timeframe, or no checkout length)
>
>    User Side:
>
>    • List of items available (categorized by type: videos, books, tapes, etc.)
>    • List of items you are on the waiting list for
>    • Your position in the list (You are 3rd in line for this item)

Automatic Pieces:

- User notification of an item coming due / past due
- User notification that the item they were waiting for has been checked back in.

This might also be able to be expanded to serve as a rental pool with just a little extra work.

Marketplace
Shopping Cart

Workaround

In the meantime, you can use an external free software app called mrbs:
http://mrbs.sf.net
But yes, agreed, this feature is missing. A new tracker field which interacts with the calendar booking days or periods (at least) might be a starting point. Somewhat like the "subscription tracker field" ( http://doc.tiki.org/Subscription+Tracker+Field ) but with booking.

Yoleonard, FYI, see this initiative currently going on:
https://dev.tiki.org/Resource+Management

Xavier de Pedro 29 Aug 19 15:23 GMT-0000

Partly Related, some enhancement in the last Tiki releases:
https://doc.tiki.org/tiki-pagehistory.php?page=Tiki20&newver=53&oldver=52
