### Description

www.mozilla.com is automatically turned into a link. (great)

but support.mozilla.com is not.

So I must do:

[http://support.mozilla.com|support.mozilla.com]

If automatic detection of support.mozilla.com is too risky, maybe the following:

[support.mozilla.com]

should be smart enough to know that I meant:  
http://support.mozilla.com

and not:  
http://dev.tikiwiki.org/support.mozilla.com
