- ☒ Module, Trackers, Multilingual; Since last visit module show code if a trackeritem is Multilingual

Description

When you close an old tracker item, it shows up again in the since_last_visit_new module as new tracker item.

This also seems to happen when you change the status to "pending".

It happens also in dev.tikiwiki.org to me (user xavi)

See this one for pending: http://dev.tikiwiki.org/tiki-view_tracker_item.php?itemId=1946

And this one for closed:

http://dev.tikiwiki.org/tiki-view_tracker_item.php?itemId=2124&trackerId=5&show=view

I logged in Jan 16th, and they appeared as new to me (user xavi, at least).

UPDATE: Still present in 12.x.
